

A · $\gamma_0 = 0.5$ learns recall far better than 0.88 or 0.9975

pass 1 · lines = mean over seeds 0-2, bands = min-max

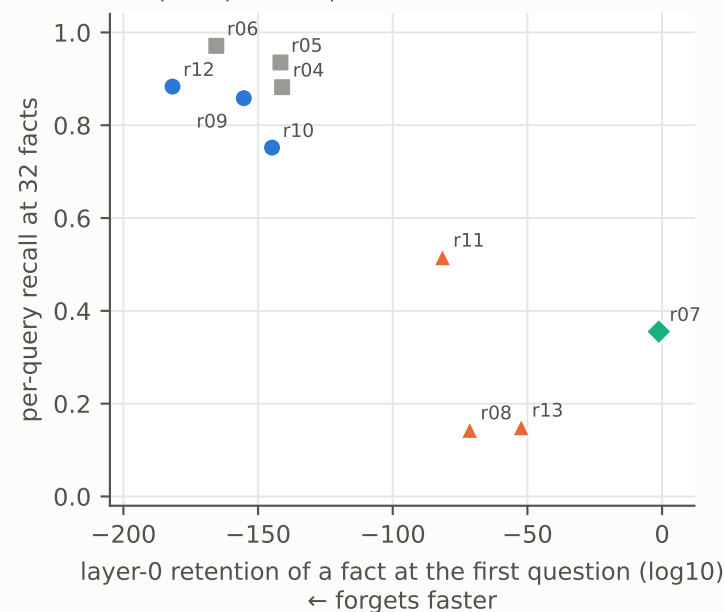

B · $\gamma_0 = 0.5$ learns faster

held-out recall per run · 0.5 at 5-10.5k steps vs 13k or never

C · Working runs forget fast in layer 0

one point per run · passes 8 and 1
